- 1. Before you begin, you will need to have information in an Excel spreadsheet format and only include the Scientific Name, Common Name and Code Name.**
- 2. Save as a Comma Separated .txt file in a location of your choice.**
- 3. Open the file in Notepad or WordPad.**
- 4. Replace the commas separating these three fields with the @ symbol.**
- 5. Select the File pull-down menu.**
- 6. Select Save As and save the file with the extension .NAM in a location of your choice.**
- 7. Launch Eagle Point.**
- 8. Launch Plant Database.**
- 9. Select the Data pull-down menu.**
- 10. Select Import From Name.**
- 11. Browse to the location you have saved the . NAM.**
- 12. Select the .NAM file and press Open.**

This imports the .NAM file into Plant Database.
