The tips, solutions and suggestions contained in Eagle Point Solution Papers, any Eagle Point Technical Assistance Document or given by an Eagle Point Technical Assistance Representative are suggested for use at your own risk. Document contents are subject to change without notice. No warranty of any kind, expressed or implied, is made with respect to such tips, solutions, and suggestions except as may be expressly stated in the licensing agreement or other contractual document, including, without limitation, any warranty of merchantability of fitness for a particular purpose. In no event is Eagle Point Software Corporation liable for incidental or consequential damages in connection with or arising out of the use of such tips, solutions and suggestions.

As always, should you have any questions regarding any phase of installation, contact Eagle Point Technical Assistance at (800) 477-0909.

Notes:

Upon restoring or setting factory defaults on a Juniper Allegro, the shortcut to SMI located on the Allegro desktop may disappear. Use the steps below to re-create the shortcut without having to reinstall SMI.

1. Double-tap on the My Computer icon on the Allegro Desktop.
2. Double-tap on the C_Drive icon.
3. Double tap on one of the folders in the following order:
 - SMI
 - SMI Allegro
 - EMU48CE
4. Scroll through the list of files and tap (highlight) the Emu48CE icon.
5. Tap File - Send To - Desktop as Shortcut.
6. Return to the Allegro Desktop (and optionally rename the newly placed short-cut to SMI).

Upon creating the shortcut, you may optionally perform the "Save System" command (Start - Programs - Utilities - Save System) to save the current Allegro settings. Should a "Reset System" be performed on the Allegro, it is suggested a "Restore System" is performed to reload the previously "saved system."
